TABLE OF CONTENTS

to Volume 85, January–April, 1977

BAIMAI, VISUT, Chromosomal polymorphisms of constitutive heterochromatin and inversions in Drosophila 85–93

BIDDLE, F. G. and F. C. FRASER, Cortisone-induced cleft palate in the mouse. A search for the genetic control of the embryonic response trait 289–302

BREEN, GAIL A. M., ALDONS J. LUSIS and KENNETH PAIGEN, Linkage of genetic determinants for mouse β-galactosidase electrophoresis and activity 73–84

CAMPBELL, D. A. and S. FOGEL, Association of chromosome loss with centromere-adjacent mitotic recombination in a yeast disomic haploid 573–585

CHAMBERS, J. R. and A. B. CHAPMAN, Genetic effects of acute spermatogonial X-irradiation of the laboratory rat 309–317

CHAPCO, WILLIAM, Correlations between chromosome segments and fitness in *Drosophila melanogaster*. I. The *X* chromosome and egg production 721–732

COBBS, GARY and SATYA PRAKASH, A comparative study of the esterase-5 locus in *Drosophila pseudoobscura*, *D. persimilis* and *D. miranda* 697–711

DUNNINGTON, E. A., J. M. WHITE and W. E. VINSON, Genetic parameters of serum cholesterol levels, activity and growth in mice 659–668

ECKARDT, FRIEDERIKE and R. H. HAYNES, Kinetics of mutation induction by ultraviolet light in excision-deficient yeast 225–247

EICHER, EVA M. and DOUGLAS L. COLEMAN, Influence of gene duplication and *X*-inactivation on mouse mitochondrial malic enzyme activity and electrophoretic patterns 647–658

EKLUND, J. and G. E. BRADFORD, Genetic analysis of a strain of mice plateaued for litter size 529–542

FLANAGAN, JAMES R., A method for fate mapping the foci of lethal and behavioral mutants in *Drosophila melanogaster* 587–607

FORKMANN, G. and W. SEYFFERT, Simulation of quantitative characters by genes with biochemically definable action. VI. Modifications of a simple model 557–572

FRANKEL, CARL and ALBERT H. ELLINGBOE, New mutations and a 7-chromosome linkage map of *Schizophyllum commune* 417–425

FRANKEL, CARL and ALBERT H. ELLINGBOE, Sexual incompatibility factors and somatic recombination in *Schizophyllum commune* 427–437

FRANKHAM, R., The nature of quantitative genetic variation in Drosophila. III. Mechanism of dosage compensation for sex-linked abdominal bristle polygenes 185–191

GENEROSO, W. M., M. KRISHNA, R. E. SOTOMAYOR and N. L. A. CACHEIRO, Delayed formation of chromosome aberrations in mouse pachytene spermatocytes treated with triethylenemelamine (TEM) 65–72

GONELLA, JAIME A. and PETER A. PETERSON, Controlling elements in a tribal maize from Colombia: *Fcu*, a two-unit system 629–645

HALL, BARRY G. and NORMA D. CLARKE, Regulation of newly evolved enzymes. III. Evolution of the *ebg* repressor during selection for enhanced lactase activity 193–201

HERNANDEZ-LUCAS, C., R. FERNANDEZ DE CALEYA, PILAR CARBONERO and F. GARCIA-OLMEDO, Control of galactosyl diglycerides in wheat endosperm by group 5 chromosomes 521–527

HICKS, JAMES B. and IRA HERSKOWITZ, Interconversion of yeast mating types. II. Restoration of mating ability to sterile mutants in homothallic and heterothallic strains 373–393

HICKS, JAMES B., JEFFREY N. STRATHERN and IRA HERSKOWITZ, Interconversion of yeast mating types. III. Action of the homothallism (*HO*) gene in cells homozygous for the mating type locus 395–405

JONES, ELIZABETH W., Bipartite structure of the *ade3* locus of *Saccharomyces cerevisiae* 209–223

JONES, ELIZABETH W., Proteinase mutants of *Saccharomyces cerevisiae* 23–33

KEPPY, D. O. and W. J. WELSHONS, The cytogenetics of a recessive visible mutant associated with a deficiency adjacent to the Notch locus in *Drosophila melanogaster* 497–506

KIDWELL, J. F., M. T. CLEGG, F. M. STEWART and T. PROUT, Regions of stable equilibria for models of differential selection in the two sexes under random mating 171–183

KIGER, JOHN A., JR., The consequences of nullosomy for a chromosomal region affecting cyclic AMP phosphodiesterase activity in Drosophila 623–628

KIGER, JOHN A., JR. and ERIC GOLANTY, A cytogenetic analysis of cyclic nucleotide phosphodiesterase activities in Drosophila 609–622

KLAR, AMAR J. S. and SEYMOUR FOGEL, The action of homothallism genes in Saccharomyces diploids during vegetative growth and the equivalence of *hm***a** and *HMα* loci functions 407–416
LI, WEN-HSIUNG, Distribution of nucleotide differences between two randomly chosen cistrons of a finite population 331–337
MARKOV, THERESE ANN and WEBER L. SMITH, Genetic analysis of phototactic behavior in *Drosophila simulans* 273–278
MOHLER, J. DAWSON, Developmental genetics of the Drosophila egg. I. Identification of 59 sex-linked cistrons with maternal effects on embryonic development 259–272
MOORE, CAROL and FRED SHERMAN, Role of DNA sequences in genetic recombination in the iso-1-cytochrome *c* gene of yeast. II. Comparison of mutants altered at the same and nearby base pairs 1–22
NAGYLAKI, THOMAS, The evolution of one- and two-locus system. II 347–354
NEWMEYER, DOROTHY and DONNA R. GALEAZZI, The instability of Neurospora duplication *Dp(1L→1R)H4250* and its genetic control 461–487
NIELSEN, JØRN TØNNES, Variation in the number of genes coding for salivary amylase in the bank vole, *Clethrionomys glareola* 155–169
NOBLE, N. A. and G. J. BREWER, Identification of a major locus contributing to erythrocyte 2, 3-diphosphoglycerate variability in hooded (Long-Evans) rats 669–679
PARK, YOUNG CHUL, Variance of gene frequencies from recurrent selection in finite populations 339–346
PETTERS, ROBERT M., A morphogenetic fate map constructed from *Habrobracon juglandis* gynandromorphs 279–287
PIMPINELLI, S., D. PIGNONE, G. SANTINI, M. GATTI and G. OLIVIERI, Mutagen specificity in the induction of chromosomal aberrations in somatic cells of *Drosophila melanogaster* 249–257
POLICANSKY, DAVID and E. ZOUROS, Gene differences between the sex ratio and standard gene arrangements of the *X* chromosome in *Drosophila persimilis* 507–511
PRAKASH, SATYA, Gene polymorphism in natural populations of *Drosophila persimilis* .. 513–520
PRAKASH, SATYA, Further studies on gene polymorphism in the mainbody and geographically isolated populations of *Drosophila pseudoobscura* 713–719
PRATT, CHARLES and ANNAMARIA TORRIANI, Complementation test between alkaline pshosphatase regulatory mutations *phoB* and *phoRc* in *Escherichia coli* 203–208
PROUT, TIMOTHY and JØRGEN BUNDGAARD, The population genetics of sperm displacement 95–124
RICHARDSON, RICHARD H., PETER E. SMOUSE and MARTHA E. RICHARDSON, Patterns of molecular variation. II. Associations of electrophoretic mobility and larval substrate within species of the *Drosophila mulleri* complex 141–154
ROEHRDANZ, RICHARD L., JAMES M. KITCHENS and JOHN C. LUCCHESI, Lack of dosage compensation for an autosomal gene relocated to the *X* chromosome in *Drosophila melanogaster* 489–496
ROTHSTEIN, RODNEY J., ROCHELLE E. ESPOSITO and MICHAEL S. ESPOSITO, The effect of ochre suppression on meiosis and ascospore formation in Saccharomyces 35–54
ROTHSTEIN, RODNEY J., A genetic fine structure analysis of the suppressor 3 locus in Saccharomyces 55–64
SMOUSE, PETER E. and JAMES V. NEEL, Multivariate analysis of gametic disequilibrium in the Yanomama 733–752
SPIELMAN, RICHARD S., JAMES V. NEEL and FRANCIS H. F. LI, Inbreeding estimation from population data: models, procedures and implications 355–371
TAYLOR, CHARLES E. and JEFFREY R. POWELL, Microgeographic differentiation of chromosomal and enzyme polymorphisms in *Drosophila persimilis* 681–695
THOMPSON, VINTON, Recombination and response to selection in *Drosophila melanogaster* 125–140
THOMSON, GLENYS, The effect of a selected locus on linked neutral loci 753–788
TURNER, BARBARA C., Euploid derivatives of duplications from a translocation in Neurospora 439–460
WATANABE, TAKAO K. and TAISHU WATANABE, Enzyme and chromosome polymorphisms in Japanese natural population of *Drosophila melanogaster* 319–329
WATTERSON, G. A., Heterosis or neutrality? 789–814
WOLFE, H. GLENN, ROBERT P. ERICKSON and LINDA C. SCHMIDT, Effects on sperm morphology by alleles at the pink-eyed dilution locus in mice 303–308
ZOUROS, E., G. B. GOLDING and TRUDY F. C. MACKAY, The effect of combining alleles into electrophoretic classes on detecting linkage disequilibrium 543–550
